All New ET Preview Makes Debut at Auto Shanghai 2019

- All new NIO ET Sedan Series made its debut at Auto Shanghai with ET Preview;
- NIO fast charging piles premiere, while NIO Power Swap station holds its first demonstration on-site;
- NIO “One Click for Power” service officially extended to other EV brand users at 280 yuan per use;

April 17, 2019 – Shanghai – At Auto Shanghai 2019, NIO offered the first glimpse of its all new Sedan product line with the ET Preview, and exhibited its entire NIO Power service solution, along with its 220 kW permanent magnet synchronous motor electric drivetrain. It also announced the extension of the “One Click for Power” service to other EV brand users.

At this year’s Auto Shanghai, NIO brought the latest NIO House experience right to the auto show itself by creating “NIO House|Auto Shanghai”. The company also showcased the high-performance electric flagship ES8 SUV; the high-performance long-range, intelligent electric ES6 SUV; the world's fastest electric car, the EP9; the NIO EVE Vision car and NIO Formula E Team car, the NIO 004. The ET Preview, the first in NIO’s sedan series also made its premiere at Auto Shanghai. The ET Preview represents NIO’s exploration of an all new car body, whose sleek new contours combine elegant proportions with power and beauty through a minimalistic design.

In terms of electric motor, ECU and power battery technology, NIO displayed its high-performance electric mobility platform which combines high-energy density NCM811 nickel-cobalt-manganese battery pack technology with high-efficiency permanent magnet motors in the front and high-performance induction motors in the rear, to achieve a NEDC cruising range of up to 510 km.

Additionally, the 220kW permanent magnet synchronous motor electric drivetrain, carbon fiber battery pack and other pioneering technologies, reflected NIO's technical prowess and research and development strength.

Also debuting at the auto show was NIO's fast charging pile, NIO Power Charger, which is the "last piece of the NIO Power service system jigsaw". Through intelligent integration with home charging piles, power stations, and mobile charging vehicles it provides users an efficient charging experience.

NIO's "One Click for Power" has currently been used over 93,000 times. During the auto show, NIO officially extended "One Click for Power" to the public. Users of other electric car brands will be able to use the "One Click for Power" charging service through the "NIO Charging" mini app in WeChat at 280 yuan per service.

60 NIO car owners volunteered as Fellows during Auto Shanghai 2019. As Fellows, they presented NIO's products and services, and shared their experience as NIO car owners with visitors to the auto show.

"After just over four years of development, NIO has grown into a tech company that is constantly perfecting itself and increasing systemic efficiency, while striving to provide high-quality service to users," said William Li, Founder, Chairman and CEO of NIO.

About NIO:

NIO's mission is to shape a joyful lifestyle by offering premium smart electric vehicles and providing the best user experience. NIO was founded in November 2014 as a global electric vehicle company. The company has over 9,000 employees working across world-class research and development, design and manufacturing centers in Shanghai, Beijing, San Jose, Munich, London and seven other locations. In 2015, NIO was the title sponsor for the Drivers' Championship winning team during the inaugural ABB FIA Formula E season. In 2016, NIO unveiled one of the fastest electric cars in the world, the EP9. The EP9 set the lap record for an electric vehicle at the Nürburgring Nordschleife and three other world-renowned tracks. In 2017, NIO unveiled its vision car EVE and announced that the NIO EP9 set a new world speed record for an autonomous vehicle at the Circuit of the Americas. NIO officially began deliveries of the ES8, the high-performance electric flagship SUV, to the general public on June 28, 2018. NIO was listed on the New York Stock Exchange on September 12, 2018. NIO officially launched the high-performance long-range electric SUV, NIO ES6, at NIO Day on December 15, 2018.
