

PRESS RELEASE

UFI Filters presents a revolution in cabin air filtration at Autopromotec

Nogarole Rocca, 18 March 2019 – UFI Filters, a leader in filtration and thermal management systems, has always been at the forefront of research into new technologies – and underlining this, the company is set to attend Autopromotec Bologna from 22 to 26 May, to present a breakthrough product that marks the birth of a new generation of cabin filtration solutions.

This technological innovation developed by the specialist filtration company is the result of the extensive experience gained through its research and development of new materials and in-house production of filter media; and will lead to significant improvements in the air quality that is breathed inside cars every day.

A selection of other products will be exhibited during the event, with a special focus on the UFI MULTITUBE, whose innovative concept has revolutionised the world of engine air filtration. Thanks to its geometric flexibility an ad hoc design approach can be taken, to suit the specific requirements of car manufacturers.

UFI Filters:

Founded in 1971, UFI Filters is a global leader in filtration technology and thermal management. It serves a wide range of sectors – from automotive, aerospace and marine to specialised industrial and customised hydraulic applications. Renowned for its innovation, UFI's products and know-how are to be found in all kinds of vehicles – from Ferrari and other top F1 teams, to the European ExoMars spacecraft. UFI supplies the full range of air, oil, fuel, cabin, hydraulic and coolant filters as well as thermal management systems to the automotive sector, meeting the needs of nearly all car brands and motorcycles as well as commercial, heavy duty and agricultural vehicles. In the OE market, UFI is a leading filtration provider. Each family of filters within the company's two aftermarket brands, UFI and Sofima, covers 96% of the European car parc.

One of the first Italian companies to identify growth opportunities in the Far East, today UFI has 16 industrial sites and employs over 4,000 people in 16 countries. It employs 120 specialised technicians in its Innovation and Research Centres and holds 206 patents. As a research-driven company, it reinvests over 5% of its revenues in R&D.
