

BREMBO PRESENTS LATEST SUSTAINABLE PRODUCTS AT EQUIP AUTO 2022

The brake specialist showcases its latest Aftermarket product line-up at Equip Auto 2022 and will be presenting numerous new product entries for the French Aftermarket.

Stezzano (Italy), 11 October, 2022 – From October 18 – 22, Brembo will again be present at Equip Auto 2022. As the leading company in the development and production of high-performance braking systems, Brembo covers a wide range of replacement braking solutions, which are divided into four different product clusters that meet all vehicle and consumer needs.

Each of the four product lines, **Brembo Essential**, **Brembo Prime**, **Brembo Beyond** and **Brembo Xtra** are designed to answer specific customer and vehicle needs, and feature the highest quality, innovation and performance which Brembo is renowned for.

At the trade fair i, the company will showcase its **Greenance Kit Concept** for the first time in France. This jointly developed new range of combined special alloy discs and dedicated brake pads greatly enriches Brembo's Aftermarket line-up. The latest future-oriented solution lasts up to 3x as long and combines a lower environmental impact – a more than 80% emissions reduction in both PM10 and PM2.5 – with top braking performance.

Also on display will be the **ENESYS ENERGY SAVING SYSTEM®**, recently introduced to the Aftermarket segment. The new solution for LCV provides excellent results in terms of the lowering of CO₂ emissions and fuel consumption. It is designed to further enhance the sustainability characteristics of a vehicle's braking system, by reducing wear on both the discs and pads.

The company, moreover, will also present its latest additions to its new product line up. As part of the Brembo Beyond product family, the **Brembo Beyond EV kit** will be on stage. The Brembo Beyond EV Kit is fully dedicated to electric vehicles and has already been awarded at the innovation gallery of Madrid Motortec in the category "mechanical components". The highlight of the Xtra family will be the **Brembo Calipers X-Style**. This new range of fixed aluminum calipers brings a splash of colour to the wheels, as it emphasises aesthetics, without compromising high technical and quality content.

These new products will be on display at the Brembo booth **Hall 1, Stand M 001**.
