PRESS RELEASE

Saleri Aftermarket's new Adaptive Switchable Water Pumps deliver OE technology to the aftermarket

Sesto Fiorentino (Florence), 10 November 2026 – Saleri Aftermarket introduces its new Adaptive Switchable Water Pumps with **Saleri patented technology** to the aftermarket sector. Officially presented during Automechanika Frankfurt 2026, this new product family covers **more than 15 million vehicles**.

Unlike systems operating solely with ON/OFF capabilities, the new Adaptive Switchable Water Pumps feature **intelligent technology, which uses variable flow to** allow the continuous adjustment of the coolant flow, according to the engine's actual thermal requirements. An **axially driven metal ring sits** at the heart of this technology, driven by an innovative actuation system developed and patented by the Saleri Group.

Combined with the pump's optimised internal geometry, this solution prevents the actuation mechanism from binding and keeps it isolated from contaminants that may be present in the coolant, helping to maintain consistent operation throughout the product's service life.

The new product family was developed to provide OE-equivalent quality though features such as a **zinc-nickel coated pulley** for corrosion protection and **consistent belt performance**, together with a **second-generation mechanical seal (Lip Seal)**, while also providing OE-equivalent flow rate and head performance.

To validate the performance of the new Adaptive Switchable Water Pumps, Saleri Aftermarket conducted a **series of comparative tests**. The results showed **faster engine warm-up**, **improved thermal stability** under demanding operating conditions, **reduced temperature peaks** and **improved cooling efficiency** compared with comparative test products.

The new product family is composed of six water pumps references, which are available as both standalone water pumps, and as part of four different **timing belt kits that include a water pump,** all of which provide a **complete repair solution**.

Saleri Aftermarket S.p.A. a Socio Unico
Società soggetta all'attività di Direzione e Coordinamento di Industrie Saleri Italo S.p.A.
Via Ruca, 406 – 25065 Lumezzane (BS) Italy
Sede Operativa: Via Rodolfo Morandi, 3
50019 Sesto Fiorentino (FI)

Capitale Sociale € 100.000,00 i.v.

About Saleri Aftermarket:

Saleri Aftermarket S.p.A. is an Italian trading company dedicated to the Independent Aftermarket (IAM), part of the Saleri Group, an OEM supplier of Thermal Management systems. Established in 2021, Saleri Aftermarket S.p.A. focuses on the specific needs of Aftermarket customers through an 8,000 sqm logistic platform in Sesto Fiorentino, Italy. It offers more than 8,000 references under SIL and Ruville brands that are used in millions of vehicles globally.
