

UFI takes centre stage again at Automechanika Frankfurt

- Visually striking new booth, now in Hall 4.0
- OE footprint with a global approach
- New range of oil filters for automatic transmissions in passenger cars

Nogarole Rocca, 11 June 2026 – UFI, a leading global provider of filtration and thermal management solutions, as well as green hydrogen technologies, is returning to Automechanika Frankfurt with a striking, two-storey booth located in **Hall 4.0, Stand D71**.

Visitors will be welcomed by a new stand layout that highlights UFI's increasingly strong ties to Formula 1. The company currently supplies all 11 teams in the premier motorsport series with various types of filters, customised for each racing team – totalling more than 6,000 filters over the course of a season. This technological know-how and professionalism are transferred to the UFI products which are developed for leading vehicle manufacturers and the independent aftermarket.

Space is also dedicated to large, eye-catching LED wall images highlighting UFI's strong OE pedigree and global footprint – reflecting the major car and heavy-duty manufacturers worldwide who choose UFI for the high quality and innovation of its filtration and thermal management solutions.

In addition, the company is optimising Automechanika Frankfurt to introduce its new line of oil filters for automatic transmissions. The product range will include 50 part numbers by the end of this year, covering around 70% of the European car parc – with the goal of reaching 100 part numbers and 90% parc coverage by 2027. Where required by original equipment specifications, the part numbers are offered in kits containing the transmission oil suction filter, pressure filter, gasket, drain plug and all the necessary accessories to facilitate service operations.

Characterised by the high quality that distinguishes every UFI filtration solution, the range stands out for delivering exceptional levels of oil purity; trapping the dirt or residues which can cause premature wear and affect the performance and lifespan of delicate automatic transmission components.

Visitors are invited to explore the UFI Booth in **Hall 4.0, Stand D71**.

PRESS RELEASE

The UFI Group:

Founded in 1971, the UFI Group is a global System Solution Provider active in the fields of filtration, thermal management and green hydrogen technologies. With over 4,300 professionals in 21 countries, 22 production sites and 57 sales offices, UFI serves the mobility, motorsport, aerospace and marine, industrial, and energy sectors worldwide. Its proprietary solutions – from advanced filter media developed in FormulaUFI, to thermal management systems for combustion, electric and hybrid vehicles, to UFI MEA membranes for green hydrogen – drive forward innovation and sustainability. UFI is a key partner for leading manufacturers of vehicles, heavy-duty vehicles (on-road and off-road) and agricultural machinery, as well as all Formula 1 teams. UFI provides vehicle maintenance services through its aftermarket brands UFI and SOFIMA. The Group holds over 360 patents and reinvests 5% of its revenue in Research & Development, with 80% of new projects focused on green technologies.
